IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Reporting Requirements Not Met for
CAVALAND SUBDIVISON WV3301972

Our water system violated drinking water monitoring requirements. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?
At this time, there is nothing you need to do.

The table below lists the monitoring we did not conduct, other violations, and the associated compliance period.

What happened? What is being done? (Describe corrective action)

The violations listed above were due to an administrative error. We have corrected the error and submitted the sample results to the West Virginia Bureau for Public Health. We are required to notify our customers that this has occurred. All samples exceeded requirements by the WVBPH and USEPA.
You do not need to take any further action.
