

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Reporting Requirements Not Met for
Charles Town Utilities WV3301905

Our water system violated drinking water monitoring requirements. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

At this time, there is nothing you need to do.

The table below lists the monitoring we did not conduct, other violations, and the associated compliance period.

Monitoring Violation	Year-Fed Report #	Monitoring Frequency	Compliance Period
53, WATER QUALITY PARAMETERS M/R (LCR) Required WQP's Results Not Submitted as Required	2020 10742	Semi-annually	JAN-JUN 2020

What happened? What is being done? (Describe corrective action)

A required sample was inadvertently reported incorrectly on a form that was submitted to the West Virginia Bureau for Public Health. This error has been corrected and resubmitted. No further action is necessary.

For more information, please contact Chris Hutzler at 304-725-3761
